

The FCC needs has the legal obligation to stop Sinclair Broadcasting from forcing their stations to air an anti-Kerry documentary. The FCC is the only organization that can keep our broadcasters honest. If you do not take action when you see examples of political vitriol and invective passed off as news, then who will?

If the FCC is even considering not acting with integrity and honor in its role as umpire, then it should be mindful that the actions of its decision-makers will be scrutinized in courts of law due to law suits backed by millions of outraged Americans. Do the right thing now, or have your dirty laundry put on public display for generations of Americans to ponder and condemn!!!
